Dear guests,

Having in mind the difficult epidemiological situation in our country, we would like to inform you that starting from January 2, 2021., in addition to other epidemiological measures that are already applied in the hotel, all guests over the age of 15 are required to have when checking into the hotel:

- negative RT-PCR test for the presence of SARS-COV-2 virus, not older than 48 hours, or
- negative antigen test, also not older than 48 hours, or
- vaccination confirmation, or
- positive serological test (IgG class of antibodies) for antibodies.

The JP Stara Planina and SP RESORT, in cooperation with the health center from Knjaževac, has enabled all guests to have the opportunity to be tested at Hotel Stara Planina with an antigen test, the price of the test is 1200.00 RSD. The expected waiting time for the test result is 15 to 20 minutes. Bearing in mind the COVID 19 guarantee that we send you in the attachment to this email, all guests that have virus presence confirmed, either during testing at the hotel, or with the submitted findings if you test in another reference laboratory, we refund the advance payment in full.

The main reason for introducing this measure is to protect you and the health of other guests. We believe that you will feel safer and more comfortable during your stay in our facilities. As a socially responsible company, we also want to set an example to the entire tourism - hotel - catering industry in order to all together contribute to the suppression of the epidemic on the territory of the Republic of Serbia. Thank you in advance for your responsibility in complying with this measure. In the hope that we will be able to visit us in the near future without any restrictions and measures, we send you greetings from the Roof of Serbia.
